COUNT I

INFRINGEMENT OF U.S. PATENT NO. 5,937,402

14. Plaintiff is the owner by assignment of United States Patent No. 5,937,402 ("the '402 Patent") entitled "System for Enabling Access to a Relational Database from an Object Oriented Program." The '402 Patent issued on August 10, 1999. A true and correct copy of the '402 Patent is attached as Exhibit A.

15. Upon information and belief, Defendant Oracle has been and now is directly infringing, and indirectly infringing by way of inducing infringement and/or contributing to the infringement of the '402 Patent in the State of Texas, in this judicial district, and elsewhere in the United States, by, among other things, making, using, selling and/or offering to sell systems and apparatuses covered by one or more claims of the '402 Patent to the injury of DataTern. Without limitation, Defendant Oracle makes, uses, sells, offers to sell and/or otherwise makes available software products, including products that use object oriented source code to employ objects that

are populated with information from a relational database (due to the fact that such objects are populated from a relational database, objects are associated with object classes generated in response to normalize relational schema object, which is a representation of a logical table from a database) that infringe one or more claims of the '402 patent. Specifically, such software products include, without limitation, Oracle TopLink, TopLink Essentials, BEA Kodo (which may incorporate OpenJPA), software products that are relabeled by third parties, such as EclipseLink, and software that incorporates one or more of these products, such as Oracle Fusion MiddleWare, and BEA Weblogic Server. Defendant Oracle is thus liable for infringement of the '402 Patent pursuant to 35 U.S.C. § 271.

16. Upon information and belief, Defendant BEA has been and now is directly infringing, and indirectly infringing by way of inducing infringement and/or contributing to the infringement of the '402 Patent in the State of Texas, in this judicial district, and elsewhere in the United States, by, among other things, making, using, selling and/or offering to sell systems and apparatuses covered by one or more claims of the '402 Patent to the injury of DataTern. Without limitation, Defendant BEA makes, uses, sells, offers to sell and/or otherwise makes available software products, including products that use object oriented source code to employ objects that are populated with information from a relational database (due to the fact that such objects are populated from a relational database, objects are associated with object classes generated in response to normalize relational schema object, which is a representation of a logical table from a database) that infringe one or more claims of the '402 patent. Specifically, such software products include, without limitation, BEA Kodo (which may incorporate OpenJPA), and software that incorporates one or more of these products, such as BEA Weblogic Server. Defendant BEA is thus liable for infringement of the '402 Patent pursuant to 35 U.S.C. § 271.

17. Upon information and belief, Defendant Sun has been and now is directly infringing, and indirectly infringing by way of inducing infringement and/or contributing to the infringement of the '402 Patent in the State of Texas, in this judicial district, and elsewhere in the United States, by, among other things, making, using, selling and/or offering to sell systems and apparatuses covered by one or more claims of the '402 Patent to the injury of DataTern. Without limitation, Defendant Sun makes, uses, sells, offers to sell and/or otherwise makes available software products, including products that use object oriented source code to employ objects that are populated with information from a relational database (due to the fact that such objects are populated from a relational database, objects are associated with object classes generated in response to normalize relational schema object, which is a representation of a logical table from a database) that infringe one or more claims of the '402 patent. Specifically, such software products include, without limitation, TopLink Essentials, made available by and thru its website (including www.glassfish.dev.java.net) that infringes one or more claims of the '402 patent. Further, Defendant Sun actively induces others to infringe by, for example, requiring compliance with its Java Persistence API ("JPA") portion of JSR 220: Enterprise JavaBeans, Version 3.0 Specification, and by delegating in JPA one or more operations of a "persistence provider runtime" that infringes one or more claims of the '402 patent. Defendant Sun is thus liable for infringement of the '402 Patent pursuant to 35 U.S.C. § 271

18. Upon information and belief, Defendant Sun has had knowledge of the '402 patent since at least July 19, 2000.

19. Upon information and belief, Defendant CollabNet has been and now is directly infringing, and indirectly infringing by way of inducing infringement and/or contributing to the infringement of the '402 Patent in the State of Texas, in this judicial district, and elsewhere in the

United States, by, among other things, making, using, selling and/or offering to sell systems and apparatuses covered by one or more claims of the '402 Patent to the injury of DataTern. Without limitation, Defendant CollabNet makes, uses, sells, offers to sell and/or otherwise makes available software products, including products that use object oriented source code to employ objects that are populated with information from a relational database (due to the fact that such objects are populated from a relational database, objects are associated with object classes generated in response to normalize relational schema object, which is a representation of a logical table from a database) that infringe one or more claims of the '402 patent. Specifically, such software products include, without limitation, TopLink Essentials, made available by and thru its website www.glassfish.dev.java.net that infringes one or more claims of the '402 patent. Defendant CollabNet is thus liable for infringement of the '402 Patent pursuant to 35 U.S.C. § 271.

20 Upon information and belief, Defendant O'Reilly has been and now is directly infringing, and indirectly infringing by way of inducing infringement and/or contributing to the infringement of the '402 Patent in the State of Texas, in this judicial district, and elsewhere in the United States, by, among other things, making, using, selling and/or offering to sell systems and apparatuses covered by one or more claims of the '402 Patent to the injury of DataTern. Without limitation, Defendant O'Reilly makes, uses, sells, offers to sell and/or otherwise makes available software products, including products that use object oriented source code to employ objects that are populated with information from a relational database (due to the fact that such objects are populated from a relational database, objects are associated with object classes generated in response to normalize relational schema object, which is a representation of a logical table from a database) that infringe one or more claims of the '402 patent. Specifically, such software

products include, without limitation, TopLink Essentials, made available by and thru its website www.glassfish.dev.java.net that infringes one or more claims of the '402 patent. Defendant O'Reilly is thus liable for infringement of the '402 Patent pursuant to 35 U.S.C. § 271.

21. On information and belief, to the extent any marking was required by 35 U.S.C. § 287, all predecessors in interest to the '402 Patent complied any with such requirements.

22. To the extent that facts learned in discovery show that Defendants' infringement of the '402 patent is or has been willful, Plaintiff reserves the right to request such a finding at time of trial.

23. As a result of these Defendants' infringement of the '402 Patent, Plaintiff has suffered monetary damages in an amount not yet determined, and will continue to suffer damages in the future unless Defendants' infringing activities are enjoined by this Court.

24. Unless a permanent injunction is issued enjoining these Defendants and their agents, servants, employees, representatives, affiliates, and all others acting on in active concert therewith from infringing the '402 Patent, Plaintiff will be greatly and irreparably harmed.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff respectfully requests that this Court enter:

1. A judgment in favor of Plaintiff that Defendants have infringed, directly, jointly, and/or indirectly, by way of inducing and/or contributing to the infringement of the '402 Patent, and that such infringement was willful;

2. A permanent injunction enjoining Defendants and their officers, directors, agents, servants, affiliates, employees, divisions, branches, subsidiaries, parents, and all others acting in active concert therewith from infringement, inducing the infringement of, or contributing to the infringement of the '402 Patent;

3. A judgment and order requiring Defendants to pay Plaintiff its damages, costs, expenses, and prejudgment and post-judgment interest for Defendants' infringement of the '402 Patent as provided under 35 U.S.C. § 284;

4. An award to Plaintiff for enhanced damages resulting from the knowing, deliberate, and willful nature of Defendants' prohibited conduct with notice being made at least as early as the date of the filing of this Complaint, as provided under 35 U.S.C. § 284;

5. A judgment and order finding that this is an exceptional case within the meaning of 35 U.S.C. § 285 and awarding to Plaintiff its reasonable attorneys' fees; and

6. Any and all other relief to which Plaintiff may show itself to be entitled.
